

Case Study - Education

Fullbrook School

OVERVIEW

An initial roof condition survey for a condition improvement fund (CIF) bid lead to successful funding to re-roof all of the flat roofs on site at Fullbrook School.

Chawton Hill were engaged to specify in detail and manage the remedial works. In doing so, we worked closely with Fullbrook School and the building contractors to make sure the project was a complete success.

About the School

Fullbrook School is a secondary school and sixth form in north west Surrey, England. Fullbrook was first established on its present site in 1954, and the original building is of a traditional 1950s style.

They provide a stimulating and exciting environment in which students can fulfil their academic potential and develop their personal and social skills from the age of 11 to 18.

Outcomes

The project was delivered both on time and on budget.

We were also able to ensure that the contractor provided a 20 year guarantee on all of the flat roofs.
